Summary

Product Designer with 8+ years of experience in e-commerce and transaction systems.
Specialized in optimizing decision flows and improving conversion through data-informed design.
Experienced in end-to-end execution and integrating AI into design workflows.

Work Experience

2020.09-2025.09 Senior Product Designer
E-commerce Platform (Dewu)

- Led redesign of core transaction flows, reducing user friction and improving checkout conversion by double-digit percentages.
- Optimized decision-heavy experiences through data-driven iterations and A/B testing, reducing drop-off across key steps.
- Simplified purchase pathways (3 steps → 1), shortening user journeys and increasing conversion efficiency.
- Built scalable design patterns for complex product selection and information-heavy interfaces.
- Collaborated cross-functionally to drive alignment and ensure high-quality delivery.

2019.06-2020.09 Product Designer (UED Lead)
Ping An Education Technology

- Led UX design and optimization across a multi-platform education product, improving overall experience consistency.
- Managed a UED team, driving experience audits and NPS-based improvements.
- Established design standards to scale consistency and improve team efficiency.
- Identified and resolved usability issues through research and iterative design.

2016.07-2019.09 Product Designer
Shanghai Hand Enterprise Solutions

- Designed a multi-role learning platform (App & Web), adopted by ~70% of middle schools in Shanghai.
- Contributed to government projects serving over 100K student users.
- Delivered end-to-end design across research, interaction, and visual design.
- Collaborated with product, engineering, and QA to ensure high-quality releases.

Education

2013.09-2017.09 Bachelor of Arts in Product Design

- Zhejiang University of Science and Technology
